TABLE OF CONTENTS

Volume 180

ARTICLES

AHARONIAN, F. A. / Very High and Ultra-High-Energy Gamma-Rays from Giant Molecular Clouds 305

AZCÁRATE, I. N. / H166α Line Emission in Southern HII Regions 105

BÖRNER, G., Z.-G. DENG, X.-Y. XIA, and Y.-Y. ZHOU / Structures in the Large-Scale Distribution of Galaxies with Different Luminosities 47

CAIMMI, R. / Two-Component, Concentric, and Co-Polar Homogeneous Spheroids in Virial Equilibrium: A Review with Additional Results 211

CHAKRABORTY, S. / A Study on Bianchi-IX Cosmological Model 293

DE, S. S., B. K. SARKAR, B. GHOSH, and M. MAL / Transient Heating of the Upper Atmosphere by Auroral Electric Field 201

GHOLIZADEH, A. / MHD Oscillatory Flow through Porous Medium 287

GRIGORIAN, L. SH. and A. A. SAHARIAN / New Alternative for General Relativity Theory 39

GURZADYAN, G. A. and M. PEREZ / Doublet 2800 MgII in Close Binary Systems 1

KIM, S. Y. / Numerical Computer Simulation of Cross-Field Propagation of a Plasma Stream in a Magnetic Field 59

KRAVTSOV, O. V. / Lagrangian Invariants in the Equilibrium Conditions of an Ideal Rotating Fluid 19

LARDNER, R. W. and S. K. TREHAN / Nonlinear Waves in a Low-Density Plasma with a Strong Magnetic Field 93

MANIHARSINGH, K. / Rotational Perturbations of Magneto-Viscous Fluid Universes Coupled with Zero-Mass Scalar Field 253

MAVROMICHALAKI, H., A. BELEHAKI, and V. SERDARI / Structure of the July 1982 Event in Relation to the Magnetosphere's Response 173

NIELD, K. M. / Observations and Analysis of the Southern Binary R Arae 233

PANDEY, S. C., M. C. DURGAPAL, and A. K. PANDE / Relativistic Polytropic Spheres in General Relativity 75

RAI, K. N. and L. THAKUR / A Mathematical Interpretation of Diffusion Processes with Concentration-Dependent Diffusion Coefficient 133

SHAROV, A. S. and A. ALKSNIS / Novae in M31 Discovered with Wide Field Telescopes in Crimea and Latvia 273

TIWARI, R. N. and S. RAY / Spherically-Symmetric Gravitational Sources of Purely Electromagnetic Origin 143

TROFIMENKO, A. P. / Rotating Black Holes in Neutron and Quark Stars: Phenomenon of Pulsars 185

YULIN, B. / A New Examination of Absorption Line Density in the Lα Forest of QSOs 113

LETTERS TO THE EDITOR

BARRICELLI, NILS AALL and OLE MARTIN LØVVIK / The Dogma of Matters Neutrino-Transparency 321
SEIMENIS, JOHN / A New Tool for the Study of Periodic Orbits 325
MISHCHENKO, M. I. / Radiation Pressure on Randomly-Oriented Nonspherical Particles 163
TAKEUTI, M. and Y. TANAKA / Note on the Model Oscillators of Irregular Stellar Variability 157
ZENG, Q., JI YANG, Y. Q. CAO, G. F. LOU, and Y. FUKUI / The Hyperfine Structures of HCN $J = 1\text{-}0$ and the Implied Physical Informations: I. S140 151

List of Forthcoming Papers 171, 333
